Auxiliary Sections

Auxiliary sections are addition sections that only apply to some users:

- Mode Filing a Separate NTD Report - Select Purchased Transportation modes where the associated service data are reported by the other party in their own NTD report.
- Separate Assets - Select modes from another NTD report where you have capital responsibility for assets used in their service.

Select any of the auxiliary sections to add them to the B-10. An auxiliary section cannot be deselected if the section contains data.
