and Oversight
FTA Office of Transit Safety and Oversight (TSO)

AASHTO Council on Public Transportation Transit Management 2025 Annual Meeting

10/15/2025

Administration's Priorities for Public Transit and Transit Safety

The mission of the Secretary, Administrator, FTA, and transit agencies alike is clear: we will be laser-focused on delivering transit projects that are on budget, on time and deliver for commuters, workers, taxpayers, and communities.

Secretary Duffy has directed major urban transit agencies from coast to coast to address crime, including fare evasion.

Requires transit systems to increase frontline transit worker involvement, giving workers more say in advancing their workplace safety.

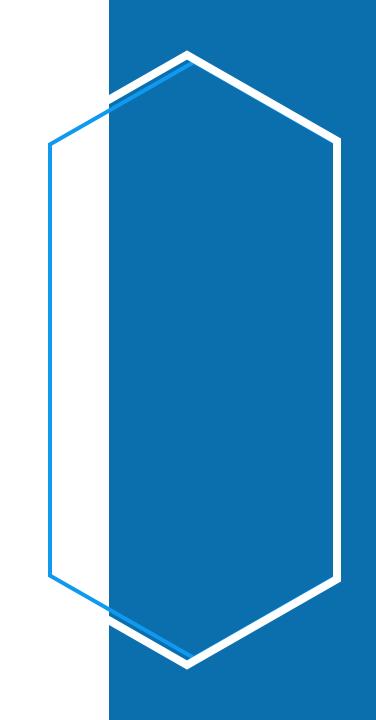

Transit workers keep our country running and they deserve our respect, investment, and protection.

*Starred categories are events that do not result in a transit worker fatality or injury.

Background

General Directive 24-1 required agencies subject to the Public Transportation Agency Safety Plan (PTASP) regulation to:

1 Conduct a safety risk assessment

2 Identify safety risk mitigations

3 Provide information to FTA within 90 days

Transit Safety Data Summary – Assaults on Transit Workers and General Directive 24-1

Assaults on transit workers are an ongoing problem, increasing 238% between 2014-2024, and 138% between 2021-2024.

FTA published General Directive 24-1 in September 2024 to address the rise in assaults.

90%

of transit agencies that submitted reports (602 agencies) conducted a safety risk assessment in response to the General Directive.

10% of transit agencies (66 agencies) reported that a safety risk assessment on the topic had been completed in the twelve months prior.

68%

of agencies determined that mitigations were necessary to address the safety risk associated with assaults on transit workers.

The remaining 32% determined the risk was at an acceptable level and that mitigations were not necessary.
