REGION 10 BULLETIN NO: 2010-65

Subject: NTI Narrowbanding Webinar

Program Area: Training

Date: August 24, 2010

The National Transit Institute (NTI) will be sponsoring a FREE webinar (\$0 for consultants and contractors) **“Narrowbanding Webinar”** on October 19, 2010 from 2:00-3:30 pm (Eastern Time), and November, 4, 2010 from 5:00-6:30 pm (Eastern Time).

The webinar is intended for senior and executive management at transit agencies who need to be aware of the mandatory narrowbanding regulations and how it will affect their agency’s radio communication system.

Two way radio systems in the VHF and UHF bands are required by the Federal Communications Commission (FCC) to narrow their transmissions by 2013. This will require many transit agencies to replace their entire radio infrastructure and subscriber units. Agencies failing to make the transition face license revocation and possible fines. Yet, there is a tremendous amount of misinformation about what must be replaced to meet the new requirements. With only two budget cycles left, are you prepared? Hear from one of the land mobile industry’s leading lawyers on the real rules and clear up the misconceptions on narrowbanding.

****Please note, we strongly recommend verifying that you have Adobe Flash version 8.0 or higher for this webinar to avoid problems that may require additional support from your IT resources. You can download Adobe Flash by clicking <http://get.adobe.com/flashplayer/>. If you are unable to install Adobe Flash, please contact your IT department before the webinar.**

If you are interested in attending, please follow this link <http://ntionline.com/CourseInfo.asp?CourseNumber=TRI36> to see detail course description and register on line.

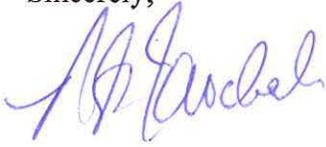

Register early to guarantee your space; **if there is a waiting list, please download the waiting list form from the web site below and fax it to (732) 932-1707.**
