Introduction

The *Transit Profiles: 2013 Report Year Summary* is one of five profiles provided in the National Transit Database (NTD) Annual Report. This volume consists of individual profiles for full reporting agencies filing an NTD Annual Report for 2013. Profiles contain general, financial, and modal data, as well as performance and trend indicators.

For the 2013 report year, 849 transit agencies submitted reports:

- 536 agencies submitted full reports,
- 282 agencies submitted Small Systems Waivers (SSW's),
- 5 agencies submitted reporting separately report, and
- 26 agencies received other waivers for detailed reporting (Reporting, Planning and Capital Waivers).

817 agencies, the total full and SSW reporters, are included in the 2013 NTD Transit Profiles. Agencies that qualified for the SSW operate thirty or fewer vehicles across all modes and types of service (TOS).

Profile Details

There are no reporting changes for the 2013 Report Year.

General information includes urbanized area (UZA) statistics, service area statistics, service consumption (system wide), service supplied (system wide) and vehicles operated in maximum service (VOMS).

Financial information includes fare revenues earned, fare revenues applied to operations, sources of operating funds expended, summary of operating expenses (OE), sources of capital funds expended and uses of capital funds. Two pie charts graphically depict sources of operating funds expended and capital funds expended. The remainder of the profile presents information separated by mode.

Please note:

- Bus (MB) and heavy rail (HR) always appear first and second if operated by an agency.
- Operating expenses (OE), fare revenues, and services supplied and consumed by mode do not include purchased transportation (PT) data reported by the sellers of service.
- Fixed Guideway directional route miles (FG DRM) include the total DRM at the agency's fiscal year end (FYE). FG segments used by more than one agency are included for each agency reporting the segments.
- Performance measures are derived from individual mode characteristics and represent cost efficiency, cost effectiveness, and service effectiveness. Graphs highlight selected

performance measures over the prior ten years for the modes shown in lines one and two.

Anomalies may exist in these graphs as the result of a report not received, a waiver granted, data deleted after validation, or data deemed questionable in a particular year.
