SECTI ON III. SECOND AVENUE SUB WAY (SAS) PROJECT

I EXECUTI VE SUMMARY

A Project Description

- General Description The Second Avenue Subway (SAS) project will connect Manhattan's Central Harle marea with the downtown financial district, relieving congested conditions on the Lexington Avenue line. The current project scope includes: tunneling, station/ancillary facilities; track, signal, and electrical work; vehicle procurement; and all other subway systems necessary for operation. The project consists of four phases, with Phase 1 providing an Initial Operating Segment (IOS) from 96th Street to 63rd Street, and will connect with the existing Broadway Line that extends to Lower Manhattan and Brooklyn. Subsequent phases will extend the line north ward to 125th Street and to the southern terminus at Hanover Square in Lower Manhattan.
- **Length** Phase 1 2.3 miles from 63rd Street to 105th Street. Total Project 8.5 miles from 125th Street and Lexington Avenue in Central Harle mto Lower Manhattan.
- No. of Stations: Total Project -16 new stations. Phase 1-t wo new mined stations located at 72nd and 86th Streets, One new cut and cover station at 96th Street, and modification of the existing 63rd Street Station on the Broadway Line.
- Additional Facilities: Newstorage tracks will be provided along the alignment and at the north and south terminals during the later phases of the project, but not as part of Phase 1.
- Vehicles: Total Project Approximately 224 railcars that are 75 feet long (28 new 8car train sets). Phase 1 - 68 new rail cars (includes 12 spares).
- Rdership Forecast: The full length SAS is forecast to carry 560,000 dailyriders in 2030. Upon completion of Phase 1, ridership is expected to be 191,000 per the MTA's Regional Travel Forecast Model.

B Project Status

• The project is in the Final Design phase.

C Schedule

- **Preli minary Engineering** (PE): Entryinto PE was approved by FTA on December 20, 2001; PE completed April 17, 2006.
- Record of Decision (ROD): Record of Decision issued on July 8, 2004.
- **Final Design** (FD): Entry into FD (Phase 1) was approved by FTA on April 18 2006.
- Full Funding Grant Agreement (FFGA): Anticipated FFGA Fall 2007.

In advance of the FFGA, MTA requested approval of an Early Systems Work Agreement (ES WA) in the amount of \$693 million. The ES WA focused on efforts associated with Contract 1 (tunnel boring). The FTA approved the ES WA on January 5, 2007.

- **Construction:** Anticipated (Phase 1) *Murch* 2007. (Contract 1, per mission to enter the Construction Phase is based upon FTA approval of the ES WA)
- **Project Complete:** Phase 1 Project percent complete is 6.98 %(based on total expenditures versus Phase 1 projected cost at completion) through *January 31, 2007.*
- Revenue Operations Date:

Phase 1 (MOS)

	Proposed	Fore			
Proposed FFGA	FFGA as A me nde d	Grantee	P MO	Act ual	
Fall 2007(1)	N A	Dec. 2013 (2)	Dec. 2013(2)	TBD	

(1) Based upon FTA's completion of the Risk Assessment, (2) Fiscal Year 2008 New Starts Submission

- Other: The Environmental Impact Statement was approved on April 8, 2004.
- Next Quarterly Review Meeting: TBD

D Cost Data for Phase 1

	Proposed FFGA Amount (1)			Current (òsts (2)	Expenditures Thru (3): January 31, 2007		
	(\$Millions)	(%)	FF GA A me nd me nt s	(\$Millions)	Percent of Total Current Cost	(\$ Millions)	Percent of Current Project Cost	
Total Project Cost:	\$3, 838. 806		N A	\$3, 838. 806		\$267.937	6. 98 %	
Total Federal share:	1, 345. 300	35.00	N A	\$37. 616 (4)		37. 616	0. 98 %	
Total FTA share:	1, 300.000		N A	Sa me				
5309 New Starts share:	1, 300. 000		N A	\$33. 418				
Total Local share:	2, 493. 506	65.00	N A	TBD		\$230.321	6.00%	
St at e share:	450.000		N A	TBD				
Agency share:	2,043.506		N A	TBD				

(1) FFGA not yet negotiated. Initially, MTACC will seek a FFGA for Phase 1 only. Amounts based on SCC Funding Sources by Category Worksheet from FY 2008 New Starts submission.

- (2) Current cost based SCC Main Worksheet -Build Alternative from FY 2008 New Starts submission.
- (3) Financial data provided monthly by $M\Gamma ACC$
- (4) Includes \$4.198 million CMAQ Funds

E Technical Capacity Review

- <u>Project Management Plan (PMP)</u>: Updated PMP (Revision 5) for the final design phase of the project was for mally submitted for FTA acceptance on January 2, 2007. Revision 5 addresses the PMOC's concerns.
- <u>Project Quality Manual (PQM) Plan</u>: Updated PQM (Revision 2) for the final design phase of the project was for mally submitted for FTA approval on January 2, 2007. Revision 2 addresses the PMOC's concerns.
- <u>Bis Heet Management Plan (BFMP)</u>: The PMOC completed its review and reached resolution on all its comments with MTACC On March 10, 2005, the PMOC recommended submission of the document to FTA, and the document was sent to the FTA on March 16, 2005.
- <u>Rail Heet Management Plan (RFMP)</u>: Updated RFMP dated May 2006 was submitted for PMOC reviewin June 2006 and covered the entire NYCT fleet. The length of the SAS Railcars, 75 feet, and the number to be procured for SAS were addressed. The PMOC completed its review of the RFMP during July 2006 and

found the plan to be acceptable. In December 2006, PMOC comments were for warded to MFACC for future updates.

F. SystemSafety Review

• The New York State Public Transportation Safety Board (NYSPTSB), the State Safety Oversight Agency (SSOA), re-certified NYCT's System Safety Program Plan (SSPP) on March 15, 2006 to the revised 49 CFR Part 659 requirements.

G Major Issues/Problems

• None.

Areas of Focus	ΥN	Stat us
State Safety Oversight Agency		
Does the state have a designated State Safety Oversight Agency (SSOA) as defined in 49 CFR Part 659?	Y	Ne w York Public Transportation Safety Board
If so, does the SSOA's authority extend to pre-revenue operations?	Y	Yes, All Phases.
Has the SSOA established its System Safety Program Standards (SSPS)?	Y	Standards are based on the requirements of 49 CRF Part 659.
Has the SSOA received, reviewed, and approved the Grantee's System Safety Program Plan (SSPP)?	Y	SSPP re-certified on March 15, 2006 per the revised 49 CFR Part 659 requirements.
Does SSOA participate in Project Development? Participation includes things such as: review design documents; attend review meetings; and comment on the how the safety aspects of the project are being addressed	Y	Reference section 227 of the SAS System Safety & Reliability Plan
Has the SSOA perfor med a pre-revenue safety review of the Grantee's project?	Ν	No
Syste m Saf et y		
Is the Grantee's overall Safety Program properly documented in its Project Management Han (PMP)?	Y	See PMP Section 3
Do the Grantee's PMP and associated Safety Program include an appropriate safety policy adopted by its top management?	Y	By approving plan
Do the Grantee's PMP and associated Safety Program establish a specific organizational entity and/or individual responsible for the Safety Program?	Y	See PMP
Do the Grantee's PMP and associated Safety Program specify staffing requirements, procedures and authority for the safety activities?	Y	See PMP Section 3

Attachment A- Safety Checklist Second Avenue Subway

Areas of Focus	ΥN	Stat us
Do the Grantee's PMP and associated Safety Program include a formal Safety Certification Program(SCP)?	Y	See PMP (draft program is available) and SAS System Safety & Reliability Plan
Do the Grantee's PMP and associated Safety Program include the development/use of a Safety Design Criteria Manual or equivalent documents?	Y	See DCM Chapter 26 and SAS System Safety & Reliability Han
Has the Grantee developed and the SSOA approved the Grantee's SSPP? What is the status of this process bet ween the Grantee and SSOA?	Y	SSPP re-certified on March 15, 2006 per the revised 49 CFR Part 659 requirements.
Is the Grantee i mplementing its Safety Program as defined in the PMP? Are the safety milestones being met? (Note: This assumes that the Safety Program is properly documented in the PMP.)	Y	See Project Schedule
Construction Safety		
Is the Grantee's Construction Safety Program (CSP) documented in the PMP?	Y	Included in the Construction Phase P MP.
Has the Grantee i mplemented its CSP?	N∕ A	Will be i mplemented during Construction
How do the Grantee's OS HA statistics compare to the national average for the same type of work? If the comparison is not favorable, what actions are being taken by the Grantee to improve its safety record?	TBD	Project is in Final Design.
Is the Grantee using wrap-up insurance on this project?	Y	NYCT has decided to use OCI P for Phase 1. MTA's Board approved purchasing the policy in December 2006.
Is the Grantee using safety incentives/disincentives on this project?	TBD	

Attachment A- Safety Checklist Second Avenue Subway

Areas of Focus	Y N	Stat us
Shared Track		
Does this project have shared track?	Ν	
Has the Grantee coordinated with FRA regarding wai vers for shared track usage?	ΝA	
Shared Corri dor		
Does this project include shared corridor? Hease describe the geography of the shared corridor.	N	
What is the Grantee doing to specifically address safety concerns in the shared corridor portion of the project?	N A

III. OBSERVATI ONS AND CURRENT ISSUES

General Agency Assessment

Funding and Budget: A total of \$267.937 million has been expended on the project through *January 31, 2007*, including \$5.455 million on the Manhattan East Side Access (ESA) study and related H S work during the 1995-1999 capital program and \$262.482 million as part of the 2000-2004 capital program

Based on PE and Extended PE final charges, the budget of \$326 452 million has been revised The current project budget of \$337.584 is for work associated with the consultant, DHA Joint Venture, for PE (\$187 M, Extended PE (\$6.9 M, Final Design (\$116 M, and Construction Phase Design Support (\$27 M. Payments a mounting to \$191.403 million for PE and \$28 117 million for Final Design for a total of \$219.522 million have been made to DHA as of January 31, 2007. **Note:** The total amount paid for PE was reduced by \$59,426 due to a 2003 Overhead adjustment. One contract modification in the amount of \$44,772 00 has been approved A summary table of funding and cost allocations is shown on page 15.

In advance of a Full Funding Grant Agreement, the MTA submitted an Early Systems Work Agreement (ES WA) request to the FTA for Phase 1 of the Second Avenue Subway (SAS) project on October 13, 2006 in the amount of \$693.0 million. The PMOC, in support of the Region, evaluated the request and concluded that it was reasonable. The PMOC issued a Spot Report on November 22, 2006 documenting its findings. The FTA approved the ES WA on January 5, 2007.

Budget Control: MFACC continued to effectively monitor, control, and report project costs and expenditures. The PMOC will continue monitoring MFACC's Budget Control during the Final Design phase and beyond.

Schedule: The following table identifies major project milestones established by the MTACC through a ward of the first construction contract. Not all milestones/activities/events are included

Activity / Event	MTACC's Schedule Information				
Activity/ Event	Current	Previous Report			
FTA Approval of Final Environmental Impact Statement (FEIS)	Apr. 8, 2004 (A)	Apr. 8, 2004 (A)			
MTA Board Approval to Advertise First D'B Tunneling Contract	Apr. 28, 2004 (A)	Apr. 28, 2004 (A)			
Notice of Availability of FEIS in Federal Register	May 7, 2004 (A)	May 7, 2004 (A)			
MTACC In-House Risk Analysis for entire Phase 1	June 4, 2004 (A)	June 4, 2004 (A)			
Contractor Session for SAS and No. 7 Line Extension	May 25, 2004(A)	May 25, 2004(A)			
Advertise 1st Design/Build Tunneling Contract	June 21, 2004 (A)	June 21, 2004 (A)			
Value Engineering 2 nd Stage for Phase 1	June 7, 2004 (A)	June 7, 2004 (A)			

Activity / Event	MTACC's Schedule Information				
Activity/ Even	Current	Previous Report			
Pre-Bid Meeting for 1st D' B Tunneling Contract	July 20, 2004 (A)	July 20, 2004 (A)			
Record of Decision (ROD)	July 8, 2004 (A)	July 8, 2004 (A)			
Submit request to enter Final Design (Phase 1) Revised request to enter Final Design (Phase 1)	Sept. 13, 2004 (A) Nov. 15, 2005 (A)	Sept. 13, 2004 (A) Nov. 15, 2005 (A)			
PE for the Full Length of SAS Substantially Complete	Dec. 20, 2004 (A)	Dec. 20, 2004 (A)			
FTA Approval to Enter Final Design	April 18, 2006(A)	April 2006 (A)			
FTA Approval of Early Systems Work Agreement	Jan. 5, 2007 (A)				
Award Contract for Tunnel Work (1st Contract)	Mar. 2007	Feb. 2007			
Complete Extended Preliminary Engineering	Nov. 30, 2005(A)	Nov. 30, 2005(A)			
Complete Final Preliminary Engineering	April 17, 2006(A)	April 17, 2006 (A)			
Award Final Design for Phase 1	April 18, 2006 (A)	April 2006 (A)			
Anticipated Receipt of Full Funding Grant Agreement	Fal1 2007	March 2007			

Schedule Control: The July 25, 2006 Final Design Baseline Schedule was integrated into the Project Master Schedule and for warded for PMOC review Subsequent discussions resolved two areas of PMOC concerni.e. pre revenue operation testing and the date of revenue operations. The Project Master Schedule is being updated to address the PMOC's concerns and is expected in *March* 2007.

FTA Requirements for Entering Into Final Design

In accordance with the FTA's April 18, 2006 letter approving entry into Final Design, seven technical and financial issues must be addressed during Final Design and resolved prior to FTA entering into a Full Funding Grant Agreement (FFGA). The following list enumerates those items and their current status:

- Update and Maintain a Current Project Level Capital Cost Estimate In support of the FY 08 New Starts Submission, Phase 1 SAS Cost Estimate Revision 5 (dated August 2006) was provided to the PMOC for review. Adjust ments have been made in several cost categories as the project has advanced into final design. The estimate, however, still reflects a total project cost of \$3.838 billion MFACC will update the estimate in Murch 2007 to reflect the bid a mount for Contract 1 and to address PMOC concerns.
- 2. Update and Maintain a Current Safety and Security Management Han MTACC completed the Safety and Security Management Han (SSMP) in October 2006 and submitted it to MTA's Safety Group, who approved its submittal for

FTA PMOC review On January 26, 2007, MTACC submitted the draft SS MP to the PMOC, and it is being reviewed by the PMOC's Safety and Security Specialists. Interviews of key SAS personnel are being set up for March 2007.

- 3. Advance the Project Design and Construction Consistent with the Environmental Mitigation Measures from the FELS and ROD - MTACC committed to developing a tracking mechanis mto ensure that all environmental nitigation measures, identified in Attachment A of the Record of Decision, are being addressed during Final Design. On July 24, 2006 MTA issued a Technical Me mor and um, which assessed the impact of design modifications made to Phase 1 since the issuance of the FEIS and the ROD The assessment was conducted to determine if any additional impacts not discussed in the FEIS and ROD would result from the design revisions. The PMOC concurs with the MTA's conclusion that there were no significant environmental impacts as a result of the refinements. In February 2007, MIA sent a letter concerning the 96th Street Station design listing additional changes, which are different than the FEIS scope, that have been made for improvement. A structural engineering study of the proposed location for Ancillary Building lindicated that the adjacent structures were potentially unsound and may collapse when demolition is performed on the site. The change involved relocating Ancillary Building 1 to a vacant lat, which resulted in fewer residential properties being required. This reduction is an improvement to the original scope. The PMOC will continue to monitor as the different contract packages are advanced into final desi gn.
- 4. Develop and I mplement a Management Hanfor Accomplishing the Rsk M tigations – The MTACC is fully cooperating in the FTA's Risk Assessment Process and made its team available for the SAS Risk Assessment Workshop during the first week of May 2006 and a Risk Mitigation workshop in July 2006. A premeeting to revie wthe Risk Characterizations by the PMOC reviewers was held in January 2007. A draft Risk Characterization report was submitted on February 16, 2007. The PMOC began holding internal Risk workshops on February 28, 2007 to prepare for the Risk Characterization workshop with the SAS teamin early March 2007. Additional workshops will be held in March and April 2007. It is anticipated that the Risk Management Program concept developed for the East Side Access project will be implemented on the SAS project.
- 5. Provide the Required Documentation to Support the Current "Medium" New Starts Rating The PMOC received the FY 2008 New Starts submission from MTACC on August 30, 2006. The PMOC review of the SCC Worksheets revealed several anomalies associated with the number of required rail vehicles, project description, and SCC Worksheet revision status. Corrections were subsequently made and new worksheets were submitted The PMOC documented its findings in a Spot report that was issued on October 9, 2006. A copy containing FTA requested corrections was transmitted on October 23, 2006. This action is considered closed.

6. Update the PMP and each Sub-plan as Applicable to Support Future Construction Activities – Updated PMP (Revision 5) for the final design phase of the project was for mally submitted to the FTA on January 2, 2007.

Updated QMP (Revision 2) for the final design phase of the project was formally submitted to the FTA on January 2, 2007.

7. **Prepare an Acceptable Before and After Study Plan** – The PMOC received the SAS Before and After Study Plan on October 24, 2006. Review of the plan is ongoing with a comparison being made bet ween the SAS plan and the ESA plan. Comments were provided to the SAS Teamin February 2007.

Project Cost Estimate: Phase 1 SAS Cost Estimate Revision 5 (dated August 2006) was issued in support of the FY 08 Ne w Starts Submission. The estimate was in the CSI and SCC for mats. As the project has advanced further into the final design phase, adjust ments have been made in several cost categories. However, the estimate is still at approximately \$3.838 billion. PMOC received the estimate in Oct ober 2006 and provided comments to the MIACC. A complete update reflecting the bid price for Contract 1 and addressing the PMOC concerns is anticipated in *Murch* 2007. The PMOC will continue to monitor the cost as the design is refined.

Quality Management Update: Update of the SAS Quality Assurance Han for the FD phase was completed in July 2006 and submitted for PMOC review on August 4, 2006. During November 2006, the PMOC and MFACC resolved all concerns and comments associated with the updated QMP. Revision 2 of the QMP was subsequently issued on November 16, 2006. The PMOC will recommend FTA approval of QMP Revision 2. On December 15, 2006, the PMOC recommended FTA accept the QMP Revision 2, which was submitted on January 2, 2007. The SAS Project Team continues to efficiently and effectively i mplement the quality management system

Design and Engineering Management: Phase 1 will consist of six construction contracts as follows – a tunnel boring contract, four Station contracts (63^{rd} S., 72^{nd} S., 86^{th} S. and 96^{th} S.) and a Systems contract. Two of the stations, 72^{nd} Street and 86^{th} Street, will be mined; the 96^{th} Street station will be cut and cover and the existing 63^{rd} Street station will be modified MFACC a warded the FD of Phase 1 to DHA on April 18, 2006 at a value of approximately \$143.485 million (\$116,000 million FD and \$27.485 million construction phase design support). Working group meetings are ongoing to support the Final Design of the various contract packages. PMOC continues to monitor these meetings.

Construction Contract #1 (G 26002 Tunnel Boring): Final design was completed by DHA in July 2006. During October 2006, MTACC and NYCT completed its internal review process and advertised the contract for bid on October 26, 2006. Asite tour and pre-bid conference were held on November 14, 2006. Two bids were received and opened on January 18, 2007. The bids were \$337.025 million and \$495.077 million. Contract award is anticipated in *Murch* 2007.

Real Estate: MTA Real Estate has taken the lead in real estate matters related to the SAS project and is responsible for acquiring the real estate interests needed for the project. Property research efforts are ongoing to support the design effort. Property information is necessary to ascertain the owners of record and the current legal descriptions of the parcels. That information is used to define the project limits and to identify suitable parcels on which to locate project structures.

The updated Real Estate Acquisition H an (REAP) dated July 2006 does not adequately address the changes required by the 2005 H nal Rule to 49 CFR Part 24, the regulation that i mplements the Uniform Relocation Assistance and Real Property Acquisition Policies Act (Uniform Act). Of major concern is payment for Moving and Related Expenses (Subpart D) and Replacement Housing Payments (Subpart E). Details of the required changes were provided to the MITA in the PMOC's review comments to the REAP. *MIACC subnitted the revised RAMP to the PMOC on February 22, 2007.*

The MTA Board approved the purchase of an OCIP Insurance Policy for the SAS at the December 2006 Board meeting.

Attachment B- Summary of Concerns and Recommendations

The status of PMO Contractor Concerns and Recommendations is shown in the following summary chart.

Note: Itens marked with a "C' in the "PMO Contractor Status" column will be dropped from future reports.

Key Item

Subtask 11 A XX	CLI N 0002 – Technical Capacity Review
Subtask 12A XX	CLIN 0003 - Monitor Project Development and Implementation

Legend
