SECTI ON III SECOND AVENUE SUB WAY (SAS) PROJECT

I EXECUTI VE SUMMARY

A Project Description

- General Description The Second Avenue Subway (SAS) project will connect Manhattan's Central Harle marea with the downtown financial district, relieving congested conditions on the Lexington Avenue line. The current project scope includes: tunneling, station/ancillary facilities; track, signal, and electrical work; vehicle procurement; and all other subway systems necessary for operation. The project consists of four phases, with Phase 1 providing an Initial Operating Segment (IOS) from 96th Street to 63rd Street, and will connect with the existing Broadway Line that extends to Lower Manhattan and Brooklyn. Subsequent phases will extend the line north ward to 125th Street and to the southern terminus at Hanover Square in Lower Manhattan.
- **Length** Phase 1 2.3 miles from 63rd Street to 105th Street. Total Project 8.5 miles from 125th Street and Lexington Avenue in Central Harle mto Lower Manhattan.
- No. of Stations: Total Project -16 new stations. Phase 1-t wo new mined stations located at 72nd and 86th Streets, One new cut and cover station at 96th Street, and modification of the existing 63rd Street Station on the Broadway Line.
- Additional Facilities: Newstorage tracks will be provided along the alignment and at the north and south terminals during the later phases of the project, but not as part of Phase 1.
- Vehicles: Total Project Approximately 224 railcars that are 75 feet long (28 new 8car train sets). Phase 1 - 68 new rail cars (includes 12 spares).
- Rdership Forecast: The full length SAS is forecast to carry 560,000 dailyriders in 2030. Upon completion of Phase 1, ridership is expected to be 191,000 per the MTA's Regional Travel Forecast Model.

B Project Status

• The project is in the Final Design/ Construction phase.

C Schedule

- **Preli minary Engineering** (PE): Entryinto PE was approved by FTA on December 20, 2001; PE completed April 17, 2006.
- Record of Decision (ROD): Record of Decision issued on July 8, 2004.
- **Final Design** (FD): Entry into FD (Phase 1) was approved by FTA on April 18 2006.
- Full Funding Grant Agreement (FFGA): Anticipated FFGA Fall 2007.

In advance of the FFGA, MTA requested approval of an Early Systems Work Agreement (ES WA) in the amount of \$693 million. The ES WA focused on efforts associated with Contract 1 (Tunnel Boring). The FTA approved the ES WA on January 5, 2007.

- **Construction:** Entry into the Construction Phase was authorized with the approval of the ES WA on January 5, 2007. The first construction contract, Contract 1 Tunnel Boring, was a warded on March 20, 2007. A Ground-Breaking cere mony was held on April 12, 2007.
- **Project Complete:** Phase 1 Project percent complete is 5.81% (based on total expenditures versus Phase 1 projected cost at completion) through *June 30*, 2007.
- Revenue Operations Date:

Phase	1(MOS)

Agency share:	3, 065. 922	87. 20		-			
Gty share:	0	0		-			

(1) FFGA not yet negotiated. Initially, MFACC will seek a FFGA for Phase 1 only. Amounts based on SCC Funding Sources by Category Worksheets with today's date of 5/1/07. Finance charges now included intotal project cost.

(2) Current cost based on SCC Main Worksheet – Build Alternative with today's date of 5/1/07.

(3) Financial data provided monthly by MTACC

E Technical Capacity Review

- <u>Project Management Plan (PMP)</u>: Updated PMP (Revision 5) for the final design/constriction phase of the project was conditionally approved by the FTA on March 22, 2007.
- <u>Project Quality Manual (PQM) Plan</u>: Updated PQM (Revision 2) for the final design/constriction phase of the project was approved by the FTA on March 22, 2007.
- <u>Bus Heet Management Plan (BFMP)</u>: Updated BFMP dated February 2007 was conditionally accepted by the FTAin May 2007.

Rail Heet Management Plan (RFMP): Updated RFMP addressing the SAS project requirements was submitted for FTA acceptance on March 6, 2007. The FTA gave conditional approval on April 24, 2007.

F. System Safety Review

• The New York State Public Transportation Safety Board, the State Safety Oversight Agency (SSOA), re-certified NYCT's System Safety Program Plan (SSPP) on March 15, 2006 to the revised 49 CFR Part 659 requirements.

G Major Issues/Problems

• None.

III. OBSERVATI ONS AND CURRENT ISSUES

Construction Contracts

Contract 1: G 26002 (Tunnels from 92nd to 63rd Streets)

This first contract provides for the construction of tunnels between 92^{nd} Street and the existing Lexington Ave./ 63^{rd} Street Station, using a Tunnel Boring Machine (TBM) and other mining methods. It includes all preparatory work for tunneling such as utility relocation and construction of a launch box and two vertical shafts. It also includes preparatory work for the subsequent contracts, such as maintenance of electrical and other facilities. Contract 1 was awarded to S3 (a joint venture).

Contract 2: G 26005 (New Station at 96th Street)

This contract provides for the construction of a new station at 96th Street and 2nd Avenue. The scope of this contract consists of the construction of the station entrances, mezzanines, platforms, ancillary buildings, ventilation plants, and modification of the existing tunnel section bet ween 96th Street and 105th Street. It includes the construction of the station structure, architectural finishes and mechanical, electrical and plumping (MEP) elements. It dso provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems Contract (Contract 6: C 26009).

Contract 3: G 26006 (Rehabilitation of Existing Lexington Avenue/63rd Street Station)

This contract provides for the rehabilitation of the existing Lexington Avenue/ 63^{rd} Street Station to accommodate the arrival of the new connection to the SAS Line. The scope of this contract consists of opening half of the station, on both the upper and lower levels, to full revenue service. New entrances are to be added at the 3^{rd} Avenue end of the station Employee facilities and all MEP facilities are to be added and rehabilitated to support both the existing "F" and new "Q" Line services. It diso provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems Contract (Contract 6: G 26009).

Contract 4: G 26007(New Station at 72nd Street)

This contract provides for the construction of a new station at 72^{nd} Street and 2^{nd} Avenue. The scope of this contract consists of the excavation for a three-track cavern, construction of station entrances, station, mezzanines, platforms, ancillary buildings and ventilation plants. It includes the construction of the station structure, architectural finishes, and MEP elements. It also provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems contract (Contract 6: G 26009).

Contract 5: G 26008 (New Station at 86th Street)

This contract provides for the construction of a new station at 86th Street and 2nd Avenue. The scope of this contract consists of the excavation for station cavern, station entrances, station, mezzanines, platforms, ancillary buildings and ventilation plants. It includes the construction of the station structure, architectural finishes, and MEP elements. It also provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems contract (Contract 6: G 26009).

Contract 6: G 26009 (Systems Contract – Track, Signals, Power and Communication)

This contract provides for the installation of all of the systems equipment, integration of the systems that link the new stations to each other and to the existing systems, and the commissioning of the systems for the revenue operation of the new SAS Line.

General Agency Assessment

Funding and Budget: A total of \$282.535 *million* has been expended on the project through *June 31, 2007* including \$5.455 million on the Manhattan East Side Access (ESA) study and related H S work during the 1995-1999 capital program and \$277.080 million as part of the 2000-2004 capital program

The current project budget of \$337.584 Mis for work associated with the consultant, DHA Joint Venture, for PE (\$187 M, Extended PE (\$6.9 M, Final Design (\$116 M, and Construction Phase Design Support (\$27 M. Payments a mounting to \$191.404 million for PE and \$42.713 million for Final Design and Construction Phase Design Support for atotal of \$234.117 million have been made to DHA as of *June 31, 2007.* Note: The total amount paid for PE was reduced by \$59,426 due to a 2003 Overhead adjust ment. One contract modification in the amount of \$44,772.00 has been approved. As unmary table of funding and cost allocations is shown on page III-19.

The MTA submitted an Early Systems Work Agreement (ES WA) request to the FTA for Phase 1 of the Second Avenue Subway (SAS) project on October 13, 2006 in the amount of \$693.0 million, which FTA approved on January 5, 2007. Currently, the FTA and MTA have set up a Task Force to expedite the submittal of the FFGA for SAS Phase 1.

Budget Control: MFACC continued to effectively monitor, control, and report project costs and expenditures. The PMOC will continue monitoring MFACC's Budget Control during the Final Design phase and beyond.

Schedule: The following table identifies major project milestones established by the MFACC through a ward of the first construction contract. Not all milestones/activities/events are included.

Anti-ity / Thoras	MTACC's Schedule Information					
Activity/ Event	Current	Previous Report				
FTA Approval of Final Environmental Impact Statement (FEIS)	Apr. 8, 2004 (A)	Apr. 8, 2004 (A)				
MTA Board Approval to Advertise First DB Tunneling Contract	Apr. 28, 2004 (A)	Apr. 28, 2004 (A)				
Notice of Availability of FEIS in Federal Register	May 7, 2004 (A)	May 7, 2004 (A)				
MTACC In-House Risk Analysis for entire Phase 1	June 4, 2004 (A)	June 4, 2004 (A)				
Contractor Session for SAS and No. 7 Line Extension	May 25, 2004(A)	May 25, 2004(A)				
Advertise 1st Design/Build Tunneling Contract	June 21, 2004 (A)	June 21, 2004 (A)				
Value Engineering 2 nd Stage for Phase 1	June 7, 2004 (A)	June 7, 2004 (A)				
Pre-Bid Meeting for 1st D' B Tunneling Contract	July 20, 2004 (A)	Jul y 20, 2004 (A)				
Record of Decision (ROD)	July 8, 2004 (A)	July 8, 2004 (A)				
Submit request to enter Final Design (Phase 1) Revised request to enter Final Design (Phase 1)	Sept. 13, 2004 (A) Nov. 15, 2005 (A)	Sept. 13, 2004 (A) Nov. 15, 2005 (A)				
PE for the Full Length of SAS Substantially Complete	Dec. 20, 2004 (A)	Dec. 20, 2004 (A)				
FTA Approval to Enter Final Design	April 18, 2006(A)	April 2006 (A)				
FTA Approval of Early Systems Work Agreement (Approval of ESWA also view as authorization to enter Construction)	Jan 5, 2007 (A)	Jan 5, 2007 (A)				
Award Contract for Tunnel Work (1st Contract)	Mar 20, 2007 (A)	Mar 20, 2007 (A)				
Complete Extended Preliminary Engineering	Nov. 30, 2005(A)	Nov. 30, 2005(A)				
Complete Final Preliminary Engineering	April 17, 2006(A)	April 17, 2006 (A)				
Award Final Design for Phase 1	April 18, 2006 (A)	April 2006 (A)				
Anticipated Receipt of Full Funding Grant Agreement	Fall 2007	Fall 2007				

Schedule Control: Updated SAS Project Phase 1 Integrated Schedule, Revision 2.4.1 dated May 8, 2007 was issued on May 15, 2007. This update reflects the following changes:

Contract #1 (Tunnel Boring) – The forecast start of construction date of March 1, 2007 was actualized as March 20, 2007. The construction duration remains 40 months.

Contract #2 (96th Street Station) – Due to the changes in the ancillary facilities design, the start of the RFP process was delayed from November 29, 2007 to December 31, 2007. The award date for this contract remains June 2, 2008. The duration of the RFQ process remains the same, 3 months, from October 1, 2007 to December 28, 2007.

Contract #3 (63rd Street Station) – The real estate acquisition was reforecasted to be completed on June 1, 2010 in lieu of October 23, 2008 (award of the construction contract not impacted). The actual start of the design activities was actualized to June 1, 2006 in lieu of the forecast date of September 1, 2006.

Contract #4 (72nd Street Station) – The study conducted to mini mize the residential real estate i mpact delayed the start of the final design. The design schedule was subsequently revised from 18.5 months to 17 months. The interi msubmission was forecasted for December 14, 2007. The final submission of RFP drawings is forecasted for Oct ober 17, 2008. The start of RFP procurement process was revised for Oct ober 20, 2008, which will support the award date of April 20, 2009, four months later than original award date of December 18, 2008.

Contract #5 (86^{th} Street Station) – No major changes of the procurement and construction dates.

Contract #6 (Systems) – The forecasted date for interimsubmission was revised to November 7, 2007. The final submission was forecasted for April 16, 2008 and the RFP drawing date revised to June 30, 2008. The RFP procurement start date was set for July 28, 2008, which will support the original a ward date of January 28, 2009.

Six months of programfloat was added as recommended by the Risk Assessment Team

FTA Requirements for Entering Into Final Design

In accordance with the FTA's April 18, 2006 letter approving entry into Final Design, seven technical and financial issues must be addressed during Final Design and resolved prior to FTA entering into a Full Funding Grant Agreement (FFGA). The following list enumerates those items and their current status:

- 1. Update and Maintain a Current Project Level Capital Cost Estimate The SAS Project Phase 1 cost estimate has been updated to address the concerns noted during the risk assessment process. Adjustments have been made to increase the unallocated contingency and support an additional 6 months' float. The cost estimate and its various attachments have been submitted to the FTA This action is considered closed
- 2. Update and Maintain a Current Safety and Security Management Han MTACC submitted the draft SAS Safety and Security Management Han (SS MP) to the PMOC on January 26, 2007 and it was reviewed by the PMOC's Safety and Security Specialists. Interviews of key SAS personnel were held on March 27, 28

and 29, 2007 and verbal comments were given to the aut hor on a page by page basis. Written comments were sent to MFACC in early May 2007. The plan is being strengthened in the security area and with responsibilities assigned PMOC and SAS Project Team efforts are ongoing in support of the FFGA application. An updated SS MP was submitted during the last week of May 2007. The PMOC review comments will be given to MATCC the first week of July 2007.

- 3. Advance the Project Design and Construction Consistent with the Environmental Mitigation Measures from the FELS and ROD MFACC committed to developing a tracking mechanis mto ensure that all environmental mitigation measures, identified in Attachment Aof the Record of Decision, are being addressed during Final Design. On July 24, 2006 MFA issued Technical Me morandum 1, which assessed the impact of design modifications made to Phase 1 since the issuance of the FELS and the ROD. The assessment was conducted to determine if any additional impacts not discussed in the FELS and ROD would result from the design revisions. The PMOC concurred with the MFA's conclusion that there were no significant environmental impacts as a result of the refinements. FTA concurrence was subsequently obtained on January 5, 2007. On February 12, 2007, MTA sent Technical Memorandum 2 concerning the 96th Street Station design listing additional changes, which are different than the FELS scope, that have been made for improvement. Technical Memorandum 3 was issued in May 2007. The PMOC will continue to monitor the different contract packages through the final design process.
- 4. Develop and I mplement a Management H and for Accomplishing the Rsk M tigations – The SAS Project Team and the FTA's Risk Assessment Team have worked effectively in addressing issues, which could impact the success of the project. A Risk Management Program has been developed through various workshops and mutual cooperation. The efforts of the Risk Assessment Team have been documented in various draft SPOT Reports. On June 6, 2007 the reports were for warded to FTA Headquarters for review. The PMOC will monitor the implementation of the Risk Management Program as the project progresses through the design, construction and test phases. This effort has been defined in a scoping document for warded to the MIACC for incorporation into the PMP.
- 5. Provide the Required Documentation to Support the Current "Medium" New Starts Rating The PMOC received the FY 2008 New Starts submission from MTACC on August 30, 2006. The PMOC review of the SCC Worksheets revealed several anomalies associated with the number of required rail vehicles, project description, and SCC Worksheet revision status. Corrections were subsequently made and new worksheets were submitted The PMOC documented its findings in a Spot report that was issued on October 9, 2006. A copy containing FTA requested corrections was transmitted on October 23, 2006. This action is considered closed.
- Update the PMP and each Sub-plan as Applicable to Support Future Construction Activities – Updated PMP (Revision 5) for the final design/construction phase of the project was approved by the FTA on March 22, 2007. Updated PQM(Revision 2) for the final design/construction phase of the

project was approved by the FTA on March 28, 2007. All documents required in support of the FFGA application are being updated (RFMP, BFMP, RAMP etc.)

7. Prepare an Acceptable Before and After Study Plan – The PMOC received the SAS Before and After Study Plan on October 24, 2006. Comments were provided to the SAS Teamin February 2007. MTACC officially submitted the Before and After plan to the FTA on March 6, 2007. The FTA Planning Office is currently reviewing the plan.

Project Cost Esti mate: The SAS Project Phase 1 cost estimate has been updated to address the concerns noted during the Risk Assessment process. Adjustments have been made to increase the unallocated contingency, real estate cost, and support an additional 6 months' float. The cost estimate and its various attachments have been submitted to the FTA in preparation for the FFGA application. Total project cost (including finance charges) is \$4.867 billion.

Quality Management: The Quality Management System addressed in SAS Project Quality Manual (PQM), Revision 2, dated November 2006, was reviewed for compliance with FTA guidance and found to be acceptable. An updated PQM was subsequently approved by the FTA on March 28, 2007. The SAS Quality Management System as described in the PQM establishes a systematic approach to ensure that the contracted products and services meet the requirements of the specifications. The SAS Project quality team continues to be proactive in the implementation of the quality management system. *Procedures are being updated and training is ongoing as new individuals join the project team*.

Design and Engineering Manage ment: Phase 1 will consist of six construction contracts as follows – a tunnel boring contract, four Station contracts (63^{rd} St., 72^{nd} St., 86^{th} St. and 96^{th} St.) and a Systems contract. Two of the stations, 72^{nd} Street and 86^{th} Street, will be mined; the 96^{th} Street station will be cut and cover and the existing 63^{rd} Street station will be modified MTACC a warded the FD of Phase 1 to DHA on April 18, 2006 at a value of approximately \$143.485 million (\$116,000 million FD and \$27.485 million construction phase design support). Working group meetings are ongoing to support the Final Design of the various contract packages. P MOC continues to monitor these meetings.

Construction Management: On May 31, 2007, MTACC awarded a contract to PB Americas to perform Construction Management services for Phase 1 of the SAS project. As Consultant Construction Manager (CCM), PB Americas will provide services for 91 months with a not-to-exceed value of \$80.9 million.

Construction Contract #1 (G 26002 Tunnel Boring): Final design was completed by DHA in July 2006. During October 2006, MFACC and NYCT completed its internal review process and advertised the contract for bid on October 26, 2006. Asite tour and pre-bid conference were held on November 14, 2006. Two bids were received and opened on January 18, 2007. The bids were \$337.025 million and \$495.077 million. Contract 1 was subsequently a warded on March 20, 2007 to S3, a joint venture of Skanska, Schiovone, and Shea. A Ground Breaking cere mony was held on April 12, 2007. Job Progress Meetings are being held every 2 weeks, initial contract submittals are being delivered and a field office has been established.

Real Estate: MTA Real Estate has taken the lead in real estate matters related to the SAS project and is responsible for acquiring the real estate interests needed for the project. MTA's real estate acquisition process is addressed in the Real Estate Acquisition Management Han (RAMP) dated July 2006. APMOC reviewrevealed that the RAMP needed to be updated to comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act (Uniform Act). An updated RAMP was submitted during the last week of May 2007. As a result of lessons learned on the Fulton Street Transit Center project which utilized the same process as the SAS project, the May 2007 RAMP will be revised Additional details are forthcoming from the FTA real estate group to the MTA

Attachment B- Summary of Concerns and Recommendations

The status of PMO Contractor Concerns and Recommendations is shown in the following summary chart.
