## SECTION III SECOND AVENUE SUBWAY (SAS) PROJECT

#### I EXECUTIVE SUMMARY

#### A. Project Description

- General Description: The Second Avenue Subway (SAS) project will connect Manhattan's Central Harlem area with the downtown financial district, relieving congested conditions on the Lexington Avenue line. The current project scope includes: tunneling; station/ancillary facilities; track, signal, and electrical work; vehicle procurement; and all other subway systems necessary for operation. The project consists of four phases, with Phase 1 providing an Initial Operating Segment (IOS) from 96<sup>th</sup> Street to 63<sup>rd</sup> Street, and will connect with the existing Broadway Line that extends to Lower Manhattan and Brooklyn. Subsequent phases will extend the line northward to 125<sup>th</sup> Street and to the southern terminus at Hanover Square in Lower Manhattan.
- **Length**: Phase 1 2.3 miles from 63<sup>rd</sup> Street to 105<sup>th</sup> Street. Total Project 8.5 miles from 125<sup>th</sup> Street and Lexington Avenue in Central Harlem to Lower Manhattan.
- **No. of Stations**: Total Project -16 new stations. Phase 1-two new mined stations located at 72<sup>nd</sup> and 86<sup>th</sup> Streets, One new cut and cover station at 96<sup>th</sup> Street, and modification of the existing 63<sup>rd</sup> Street Station on the Broadway Line.
- Additional Facilities: New storage tracks will be provided along the alignment and at the north and south terminals during the later phases of the project, but not as part of Phase 1.
- **Vehicles**: Total Project Approximately 224 railcars that are 75 feet long (28 new 8-car train sets). Phase 1 68 new rail cars (includes 12 spares).
- Ridership Forecast: The full length SAS is forecast to carry 560,000 daily riders in 2030. Upon completion of Phase 1, ridership is expected to be 191,000 per the MTA's Regional Travel Forecast Model.

#### **B.** Project Status

The project is in the Final Design/Construction phase.

#### C. Schedule

- **Preliminary Engineering** (PE): Entry into PE was approved by FTA on December 20, 2001; PE completed April 17, 2006.
- **Record of Decision** (ROD): Record of Decision issued on July 8, 2004.
- **Final Design** (FD): Entry into FD (Phase 1) was approved by FTA on April 18 2006.
- Full Funding Grant Agreement (FFGA): Anticipated FFGA Fall 2007.

In advance of the FFGA, MTA requested approval of an Early Systems Work Agreement (ESWA) in the amount of \$693 million. The ESWA focused on efforts associated with Contract 1 (Tunnel Boring). The FTA approved the ESWA on January 5, 2007.

- Construction: Entry into the Construction Phase was authorized with the approval of the ESWA on January 5, 2007. The first construction contract, Contract 1 Tunnel Boring, was awarded on March 20, 2007. A Ground-Breaking ceremony was held on April 12, 2007.
- **Project Complete:** Phase 1 Project percent complete is 6.06% (based on total expenditures versus Phase 1 projected cost at completion) through *September 30*, 2007.
- Revenue Operations Date:

#### Phase 1 (MOS)

	Proposed	Fore		
Proposed FFGA	FFGA as Amended	Grantee	PMO	Actual
Fall 2007	N/A	June 2014 (1)	June 2014	TBD

- (1) Updated SAS Project Phase 1 Integrated Schedule, Revision 2.5.1 dated May 31, 2007
- Other: The Environmental Impact Statement was approved on April 8, 2004.
- Next Quarterly Review Meeting: October 3, 2007.

#### D. Cost Data for Phase 1

	Proposed F			Current C	osts (2)	Expenditures Thru September 30, 2007		
	(\$ Millions)	(%)	FFGA Amendments	(\$ Millions) Percen of Tota Curren Cost		(\$ Millions)	Percent of Current Project Cost	
Total Project Cost:	\$4,866.614	100	N/A	\$4,866.614		\$294.794	6.06	
Total Federal share:	1,350.692	27.75		40.076	-	39.682	.82	
Total FTA share:	1,300.000	96.25		33.419	-			
5309 New Starts share	1,300.000	96.25		33.419	-			
Total FHWA share:	50.692	3.75		6.657	-			
CMAQ	48.233	95.15		4.198	-			
Special Highway Appropriation	2.459	4.85		2.459	-			
Total Local share:	3,515.922	72.25		273.984		255.111	5.24	
State share:	450.000	12.80		-				
Agency share:	3,065.922	87.20		-				
City share:	0	0		-				

<sup>(1)</sup> FFGA not yet negotiated. Initially, MTACC will seek a FFGA for Phase 1 only. Amounts based on SCC Funding Sources by Category Worksheets with today's date of 5/1/07. Finance charges now included in total project cost.

- (2) Current cost based on SCC Main Worksheet Build Alternative dated of 5/1/07.
- (3) Financial data provided monthly by MTACC.

#### E. Technical Capacity Review

- Project Management Plan (PMP): Updated PMP (Revision 5) for the final design/constriction phase of the project was conditionally approved by the FTA on March 22, 2007.
- Project Quality Manual (PQM) Plan: Updated PQM (Revision 2) for the final design/constriction phase of the project was approved by the FTA on March 28, 2007.
- Bus Fleet Management Plan (BFMP): Updated BFMP dated February 2007 was conditionally accepted by the FTA in May 2007.

• Rail Fleet Management Plan (RFMP): Updated RFMP addressing the SAS project requirements was submitted for FTA acceptance on March 6, 2007. The FTA gave conditional approval on April 24, 2007.

#### F. System Safety Review

■ The New York State Public Transportation Safety Board, the State Safety Oversight Agency (SSOA), re-certified NYCT's System Safety Program Plan (SSPP) on March 15, 2006 to the revised 49 CFR Part 659 requirements.

## G. Major Issues/Problems

None.

Attachment A - Safety Checklist Second Avenue Subway

Areas of Focus	Y/N	Status					
State Safety Oversight Agency							
Does the state have a designated State Safety Oversight Agency (SSOA) as defined in 49 CFR Part 659?	Y	New York Public Transportation Safety Board.					
If so, does the SSOA's authority extend to pre-revenue operations?	Y	Yes, All Phases.					
Has the SSOA established its System Safety Program Standards (SSPS)?	Y	Standards are based on the requirements of 49 CRF Part 659.					
Has the SSOA received, reviewed, and approved the Grantee's System Safety Program Plan (SSPP)?	Y	SSPP re-certified on March 15, 2006 per the revised 49 CFR Part 659 requirements.					
Does SSOA participate in Project Development? Participation includes things such as: review design documents; attend review meetings; and comment on the how the safety aspects of the project are being addressed.	Y	Reference section 2.2.7 of the SAS System Safety & Reliability Plan.					
Has the SSOA performed a pre-revenue safety review of the Grantee's project?	N	No					
System Safety							
Is the Grantee's overall Safety Program properly documented in its Project Management Plan (PMP)?	Y	See PMP Section 3					
Do the Grantee's PMP and associated Safety Program include an appropriate safety policy adopted by its top management?	Y	By approving plan					
Do the Grantee's PMP and associated Safety Program establish a specific organizational entity and/or individual responsible for the Safety Program?	Y	See PMP					
Do the Grantee's PMP and associated Safety Program specify staffing requirements, procedures and authority for the safety activities?	Y	See PMP Section 3					

Attachment A - Safety Checklist Second Avenue Subway

Areas of Focus	Y/N	Status
Do the Grantee's PMP and associated Safety Program include a formal Safety Certification Program (SCP)?	Y	See PMP (draft program is available) and SAS System Safety & Reliability Plan.
Do the Grantee's PMP and associated Safety Program include the development/use of a Safety Design Criteria Manual or equivalent documents?	Y	See DCM Chapter 26 and SAS System Safety & Reliability Plan.
Has the Grantee developed and the SSOA approved the Grantee's SSPP? What is the status of this process between the Grantee and SSOA?	Y	SSPP re-certified on March 15, 2006 per the revised 49 CFR Part 659 requirements.
Is the Grantee implementing its Safety Program as defined in the PMP? Are the safety milestones being met? (Note: This assumes that the Safety Program is properly documented in the PMP.)	Y	See Project Schedule
Construction Safety		
Is the Grantee's Construction Safety Program (CSP) documented in the PMP?	Y	Included in the Construction Phase PMP.
Has the Grantee implemented its CSP?	Y	Section 011150 of the General Requirements specifies the requirement for furnishing all labor, material, tools, equipment, procedures and safety plans necessary to create and maintain a safe work environment.
How do the Grantee's OSHA statistics compare to the national average for the same type of work? If the comparison is not favorable, what actions are being taken by the Grantee to improve its safety record?	Y	Statistical data being accumulated for the SAS project.

# Attachment A - Safety Checklist Second Avenue Subway

Areas of Focus	Y/N	Status
Is the Grantee using wrap-up insurance on this project?	Y	Owner Controlled Insurance Program (OCIP) has been implemented. Insurance coverage by Allied North America, administered by Project Technologies International, LLC.
Is the Grantee using safety incentives/disincentives on this project?	Y	Ongoing.
Shared Track		
Does this project have shared track?	N	
Has the Grantee coordinated with FRA regarding waivers for shared track usage?	N/A	
Shared Corridor		
Does this project include shared corridor? Please describe the geography of the shared corridor.	N	
What is the Grantee doing to specifically address safety concerns in the shared corridor portion of the project?	N/A	

 $Table \ 1-FFGA \ Application \ Checklist \ SAS \ Phase \ 1$ 

Document	Agency	Target Date	Status/Comments
1.0		Date	
Annual Certs & Assurances	MTA		
Grant Application	MTA	7/2007	
Federal STIP Approval	FTA		
Record of Decision/FONSI	FTA	07/08/04 (A)	
Civil Rights Program Review	FTA		
Project Management Plan (PMP)	MTA	03/22/07 (A)	Updated PMP (Revision 5) for the final design/construction phase of the project was conditionally approved by the FTA on March 22, 2007.
Quality Management Plan Project Quality Manual (PQM)	MTA	03/28/07 (A)	Updated PQM (Revision 2) for the final design/construction phase of the project was approved by the FTA on March 28, 2007.
Safety and Security Management Plan (SSMP)	MTA	08/18/06	MTACC submitted an informal draft of the Safety and Security Management Plan (SSMP) for PMOC review on January 26, 2007. The PMOC provided written comments the first week in May 2007. SAS project team submitted an updated SSMP on May 30, 2007. The FTA conditionally approved the SSMP on August 21, 2007 based on this version. PMOC reviewed comments with SAS team on July 6, 2007 and the updated version was submitted July 19, 2007. The SAS Team is adding a chapter on Security Criteria to its Design Criteria Manual and this will complete the changes at this time. The PMOC Spot Report will be submitted following receipt of the Security Criteria, which is expected in early October 2007.
Rail Fleet Management Plan (RFMP)	MTA	04/24/07 (A)	The FTA gave conditional acceptance on April 24, 2007.

 $Table \ 1-FFGA \ Application \ Checklist \ SAS \ Phase \ 1$ 

Document	Agency	Target Date	Status/Comments
Bus Fleet Management Plan (BFMP)	МТА	May 2007 (A)	The Bus Fleet Management Plan was submitted to the FTA for acceptance on March 23, 2007. PMOC comments were provided and FTA subsequently conditionally accepted the BFMP in May 2007 with minor corrections noted for future update.
Real Estate Acquisition Plan (RAMP)	MTA	07/25/06	The updated RAMP was received on February 22, 2007and PMOC comments were sent to MTACC on March 30, 2007.
			An updated RAMP was submitted during the last week of May 2007. This RAMP is being revised to incorporate lessons learned from the review of the Fulton Street Transit Center project. Details were included in the FTA's August 13, 2007 letter to the MTA. This plan is expected in October 2007.
Interagency and RR/Joint Use Corridor Agreements	MTA	N/A	
Value Engineering	MTA		Completed for Phase 1 of the project.
Spot Report - Risk Assessment	PMOC	TBD	The PMOC held Risk Assessment workshops with MTACC in March 2007 to review Risk Characterization, Escalation, Contingency and Project Delivery Methods. A Project Execution Strategy workshop was held April 10, 11 & 12, 2007. The Risk Register meeting was held in May 2007 and a draft Spot Report was issued for review. PMOC is developing a Risk Mitigation plan and a Spot Report on Risk Mitigation and Oversight.
Financing Plan	MTA	09/06 (A)	Submitted as part of FY 08 New Starts submission.
Financial Capacity Review	FMOC	03/07

Pr	Item Identification Nature of Problem		Grantee Action		ction	Comments	Status	
11	Trem Identification	Tuchtification	Nature of Frontein	D	A	I	Comments	Status

There are no open items.

#### III. OBSERVATIONS AND CURRENT ISSUES

#### **Construction Contracts**

The construction effort associated with Phase 1 of the SAS Project is currently defined in 6 Construction Packages (contracts) as indicated below. Efforts however are underway to reallocate the scope of work in Contracts 2, 4, and 5 because each has an estimated value greater than \$400 million. MTACC is taking this action because contractors are having difficulty getting bonding on projects valued greater than \$400 million. The rescoping of the work will give more contractors the opportunity to bid on the project.

## **Contract 1: C-26002 (Tunnels from 92<sup>nd</sup> to 63<sup>rd</sup> Streets)**

This first contract provides for the construction of tunnels between 92nd Street and the existing Lexington Ave./63rd Street Station, using a Tunnel Boring Machine (TBM) and other mining methods. It includes all preparatory work for tunneling, such as utility relocation and construction of a launch box and two vertical shafts. It also includes preparatory work for the subsequent contracts, such as maintenance of electrical and other facilities. Contract 1 was awarded to S3 Tunnel Contractors (a joint venture of Skanska, Schiavone and Shea). This project is currently 36 days behind schedule due to the discovery of utilities and a large subsurface wall, which were not on the plans. The contractor is working Saturdays to recover the lost time. The project is within budget, with 5 Additional Work Orders (AWO) approved for \$445,000. There have been no lost time accidents.

#### Contract 2: C-26005 (New Station at 96<sup>th</sup> Street)

This contract provides for the construction of a new station at 96th Street and 2nd Avenue. The repackaging of this contract will reallocate the scope of work into two separate packages (2A - Station Structure and Heavy Civil and 2B – Station Finishes & MEP). Contract 2A's scope of work will include construction of the station structure, the station entrances, mezzanines, platforms, ancillary buildings, ventilation plants, and modification of the existing tunnel section between 96th Street and 105th Street. Contract 2B's scope of work will include the construction of the station architectural finishes and mechanical, electrical and plumbing (MEP) elements. It also provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems Contract (Contract 6: C-26009).

# Contract 3: C-26006 (Rehabilitation of Existing Lexington Avenue/63<sup>rd</sup> Street Station)

This contract provides for the rehabilitation of the existing Lexington Avenue/63rd Street Station to accommodate the connection to the SAS Line. The scope of this contract consists of opening half of the station, on both the upper and lower levels, to full revenue service. New entrances are to be added at the 3rd Avenue end of the station. Employee facilities and all MEP facilities are to be added and rehabilitated to support both the existing "F" and new "Q" Line services. It also provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems Contract (Contract 6: C-26009).

### Contract 4: C-26007 (New Station at 72<sup>nd</sup> Street)

This contract provides for the construction of a new station at 72nd Street and 2nd Avenue. The repackaging of this contract will reallocate the scope of work into three separate packages (4A – Station Cavern and Heavy Civil, 4B – Station Finishes and MEP, and 4C – Tunnels G3/G4 from 63<sup>rd</sup> Street). Contract 4A's scope of work will include excavation for a three track cavern, construction of the station structure, the station entrances, mezzanines, platforms, ancillary buildings and ventilation plants. Contract 4B's scope of work will include the construction of the station architectural finishes and MEP elements. It also provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems Contract (Contract 6: C-26009). Contract 4C's scope of work will include the mining of tunnels G3 and G4 from the 63<sup>rd</sup> Street Station to the 72<sup>nd</sup> Street Station.

## Contract 5: C-26008 (New Station at 86<sup>th</sup> Street)

This contract provides for the construction of a new station at 86th Street and 2nd Avenue. The repackaging of this contract will reallocate the scope of work into two separate packages (5A - Stations Structure and Heavy Civil and 5B – Station Finishes & MEP). Contract 5A's scope of work will include excavating the station cavern, construction of the station's structure, entrances, mezzanines, platforms, ancillary buildings and ventilation plants. Contract 5B's scope of work will include the construction of the station architectural finishes and MEP elements. It also provides for the infrastructure (structure, finishes, power, and MEP requirements) for the Systems Contract (Contract 6: C-26009).

#### **Contract 6: C-26009 (Systems Contract –Track, Signals, Power and Communication)**

This contract provides for the installation of all of the systems equipment, integration of the systems that link the new stations to each other and to the existing systems, and the commissioning of the systems for the revenue operation of the new SAS Line.

#### **General Agency Assessment**

**Funding and Budget**: A total of \$294.794 million has been expended on the project through *September 30*, 2007, including \$5.455 million on the Manhattan East Side Access (ESA) study and related FEIS work during the 1995-1999 capital program and \$289.339 million as part of the 2000-2004 capital program.

The current project budget of \$337.584 million is for work associated with the consultant, DHA Joint Venture, for PE (\$187 million), Extended PE (\$6.9 million), Final Design (\$116 million), and Construction Phase Design Support (\$27 million). Payments amounting to \$194.099 million for PE and \$52.071 million for Final Design and Construction Phase Design Support for a total of \$245.705 million have been made to DHA as of September 30, 2007.

**Note**: The total amount paid for PE was reduced by \$59,426 due to a 2003 Overhead adjustment. One contract modification in the amount of \$44,772 has been approved. A summary table of funding and cost allocations is shown on page III-20.

The MTA submitted an Early Systems Work Agreement (ESWA) request to the FTA for Phase 1 of the Second Avenue Subway (SAS) project on October 13, 2006 in the amount of \$693.0 million, which FTA approved on January 5, 2007.

The MTA anticipates receiving a FFGA grant in the Fall of 2007.

**Budget Control**: MTACC continued to effectively monitor, control, and report project costs and expenditures. The PMOC will continue monitoring MTACC's Budget Control during the Final Design phase and beyond.

**Schedule:** The following table identifies major project milestones established by the MTACC through award of the first construction contract. Not all milestones/activities/events are included.

A stimites / Toward	MTACC's Sche	dule Information
Activity / Event	Current	Previous Report
FTA Approval of Final Environmental Impact Statement (FEIS)	Apr. 8, 2004 (A)	Apr. 8, 2004 (A)
MTA Board Approval to Advertise First D/B Tunneling Contract	Apr. 28, 2004 (A)	Apr. 28, 2004 (A)
Notice of Availability of FEIS in Federal Register	May 7, 2004 (A)	May 7, 2004 (A)

Award Final Design for Phase 1	April 18, 2006 (A)	April 2006 (A)
Anticipated Receipt of Full Funding Grant Agreement	Fall 2007	Fall 2007

**Schedule Control**: MTACC issued an updated SAS Project Phase 1 Integrated Schedule, Revision 2.4.1 dated May 8, 2007 on May 15, 2007. This update reflects the following changes:

**Contract #1 (Tunnel Boring)** – The forecast start of construction date of March 1, 2007 was actualized as March 20, 2007. The construction duration remains 40 months

Contract #2 (96<sup>th</sup> Street Station) – Due to the changes in the ancillary facilities design, the start of the RFP process was delayed from November 29, 2007 to December 31, 2007. The award date for this contract remains June 2, 2008. The duration of the RFQ process remains the same, 3 months, from October 1, 2007 to December 28, 2007.

Contract #3 (63<sup>rd</sup> Street Station) – The MTACC has reforecast that real estate acquisition will be completed on June 1, 2010 in lieu of October 23, 2008 (award of the construction contract not impacted). The actual start of the design activities was actualized to June 1, 2006 in lieu of the forecast date of September 1, 2006.

Contract #4 (72<sup>nd</sup> Street Station) – The study conducted to minimize the residential real estate impact delayed the start of the final design. The design schedule was subsequently revised from 18.5 months to 17 months. The interim submission was forecast for December 14, 2007. The final submission of RFP drawings is forecast for October 17, 2008. The start of RFP procurement process was revised for October 20, 2008, which will support the award date of April 20, 2009, four months later than original award date of December 18, 2008.

Contract #5 (86<sup>th</sup> Street Station) – No major changes of the procurement and construction dates.

Contract #6 (Systems) – The MTACC revised its forecast date for interim submission to November 7, 2007. The final submission was forecast for April 16, 2008 and the RFP drawing date revised to June 30, 2008. The RFP procurement start date was set for July 28, 2008, which will support the original award date of January 28, 2009.

MTACC added six months of program float as recommended by the Risk Assessment Team, subsequently resulting in a Revenue Operations Date of June 2014. *However the schedule is being reevaluated as a result of the proposed repackaging plan.* 

**FTA Requirements for Entering Into Final Design:** In accordance with the FTA's April 18, 2006 letter approving entry into Final Design, MTACC must address and resolve seven technical and financial issues during Final Design and prior to FTA entering into a Full Funding Grant Agreement (FFGA). The following list enumerates those items and their current status:

- Update and Maintain a Current Project Level Capital Cost Estimate MTACC
  has updated the SAS Project Phase 1 cost estimate to address the concerns noted
  during the risk assessment process. It has made adjustments to increase the
  unallocated contingency and support an additional 6 months' float. The cost
  estimate and its various attachments have been submitted to the FTA. This action is
  considered closed.
- 2. Update and Maintain a Current Safety and Security Management Plan MTACC submitted an informal draft SAS Safety and Security Management Plan (SSMP) to the PMOC on January 26, 2007 and it was reviewed by the PMOC's Safety and Security Specialists. Interviews of key SAS personnel were held on March 27, 28 and 29, 2007 and verbal comments were given to the author on a page

by page basis. Written comments were sent to MTACC in early May 2007. The plan needed to be strengthened in the security area and with responsibilities assigned. The informal draft SSMP was updated and resubmitted to the PMOC during the last week of May 2007. The PMOC provided additional comments on July 6, 2007 with MTACC subsequently updating the SSMP on July 19, 2007. During a conference call between the PMOC and FTA regarding the SAS SSMP, there was agreement that the MTACC should be requested to submit Security Design Criteria similar to that submitted by East Side Access. The PMOC requested this material and MTACC agreed to develop and send it right away. Once this material is received and checked by the PMOC, the Spot Report can be completed and submitted.

- 3. Advance the Project Design and Construction Consistent with the Environmental Mitigation Measures from the FEIS and ROD MTACC committed to developing a tracking mechanism to ensure that all environmental mitigation measures, identified in Attachment A of the Record of Decision, are being addressed during Final Design. To date, 3 Technical Memorandums have been issued that address changes to the project subsequent to the FEIS and ROD. On July 30, 2007, the FTA concurred with Memorandum 3 that the design changes to the SAS Project will not result in additional significant adverse environmental impacts. If changes are made in the future, FTA will need to determine if additional environmental studies will be necessary before the changes are approved. MTACC is preparing Technical Memorandum No.4 to address a change to entrance number 3 at the 72<sup>nd</sup> Street Station.
- 4. **Develop and Implement a Management Plan for Accomplishing the Risk Mitigations** The SAS Project Team and the FTA's Risk Assessment Team have worked effectively in addressing issues, which could impact the success of the project. They have developed a Risk Management Program through various workshops and mutual cooperation. The PMOC has documented the efforts of the Risk Assessment Team in various draft Spot Reports. On June 6, 2007 the PMOC forwarded the reports to FTA Headquarters for review. The PMOC will monitor the implementation of the Risk Management Program as the project progresses through the design, construction and test phases. The MTACC will define the risk mitigation initiatives in a scoping document for incorporation into the PMP. *The PMOC will review the scoping document with MTACC in October 2007*.
- 5. Provide the Required Documentation to Support the Current "Medium" New Starts Rating The PMOC received the FY 2008 New Starts submission from MTACC on August 30, 2006. The PMOC review of the SCC Worksheets revealed several anomalies associated with the number of required rail vehicles, project description, and SCC Worksheet revision status. MTACC made the required corrections and submitted new worksheets. The PMOC documented its findings in a Spot report that it issued on October 9, 2006. A copy containing FTA requested corrections was transmitted to MTACC on October 23, 2006. This action is considered closed.

- 6. Update the PMP and each Sub-plan as Applicable to Support Future Construction Activities Updated PMP (Revision 5) for the final design/construction phase of the project was approved by the FTA on March 22, 2007. The FTA approved an updated PQM (Revision 2) for the final design/construction phase of the project on March 28, 2007. MTCC has updated all documents required in support of the FFGA application (RFMP, BFMP, RAMP, etc.). This action is considered closed.
- 7. Prepare an Acceptable Before and After Study Plan The PMOC received the SAS Before and After Study Plan on October 24, 2006 and provided comments to the SAS Team in February 2007. MTACC officially submitted the Before and After plan to the FTA on March 6, 2007. The FTA Planning Office is currently reviewing the plan.

**Project Cost Estimate:** The MTACC has updated the SAS Project Phase 1 cost estimate to address the concerns noted during the Risk Assessment process. Adjustments have been made to increase the unallocated contingency, real estate cost, and support an additional 6 months' float. The MTACC has submitted the cost estimate and its various attachments to the FTA in preparation for the FFGA application. Total project cost (including finance charges) is \$4.867 billion.

Quality Management: The PMOC reviewed the Quality Management System, addressed in SAS Project Quality Manual (PQM), Revision 2, dated November 2006, and found that it complied with FTA guidance and was therefore acceptable. The FTA subsequently approved an updated PQM was on March 28, 2007. The SAS Quality Management System as described in the PQM establishes a systematic approach to ensure that the contracted products and services meet the requirements of the specifications. The SAS Project quality team continues to be proactive in the implementation of the quality management system. The SAS Quality Assurance Manager approved the Quality Management System to be utilized by S3 (Contract 1-tunnel boring contractor) in July 2007. S3's quality personnel are actively conducting preparatory phase session meetings, design process control reviews, incoming and in-process materials inspections and test monitoring.

**Design and Engineering Management:** MTACC awarded the FD of Phase 1 to DHA on April 18, 2006 at a value of approximately \$143.485 million (\$116.000 million FD and \$27.485 million construction phase design support). Design completion milestones have been incorporated into the project schedule. Because of the rescoping of Contracts 3, 4 and 5 these milestones might be impacted. Working group meetings are ongoing to support the Final Design of the various contract packages. PMOC continues to monitor these meetings.

Construction Management: On May 31, 2007, MTACC awarded a contract to PB Americas to perform Construction Management services for Phase 1 of the SAS project. As Consultant Construction Manager (CCM), PB Americas will provide services for 91 months with a not-to-exceed value of \$80.9 million. PB is playing an active role coordinating activities among the various agencies, the contractor (S3) and the SAS Project Team. S3 concerns are being addressed with action items being assigned and tracked for closure. Working Group and Job Progress Meetings are being held bi-weekly to keep all parties informed. *The PMOC attended the first job progress meetings in September 2007 and toured the site following the meetings.* 

Construction Contract #1 (C-26002 Tunnel Boring): Contract 1 was awarded on March 20, 2007 to S3, a joint venture of Skanska, Schiovone, and Shea. Contract submittals (Shop Drawings, RFI's, etc.) are being handled on time per the contract. The CPM schedule was approved in August 2007 by MTACC. PMOC has not received a copy of the approved schedule. Work on the Launch Box is progressing between 96<sup>th</sup> and 90<sup>th</sup> streets, with utilities relocation, pre-trenching for secant/slurry walls and installation of replacement wooden staircases for building access. MTACC and the contractor are negotiating the cost of removing a subsurface wall that is blocking the sewer relocation on the west side of Second Avenue between 92<sup>nd</sup> and 93<sup>rd</sup> streets. A total of 5 AWO's have been settled with the contractor for a cost of \$445,000. The design of a pile supported sewer, as requested by the New York City Department of Environmental Protection (NYCDEP) is still being worked out by MTACC and NYCDEP. S3 and the insurance carrier are very proactive with regards to safety. Safety meetings are held weekly Both the PMOC and FTA representatives will need to attend the contractor's safety orientation class prior to getting access to the job site.

**Real Estate:** MTA Real Estate is handling all real estate matters related to the SAS project and is responsible for acquiring the real estate interests needed for the project. MTA's real estate acquisition process is addressed in the Real Estate Acquisition Management Plan (RAMP) dated July 2006. The last Public Hearing required for the proposed acquisition of temporary, permanent and fee interests in the properties for the four stations (63<sup>rd</sup>, 72<sup>nd</sup>, 86<sup>th</sup> & 96<sup>th</sup> streets) was held on September 20, 2007. Respondents have until the end of 2007 to challenge the MTA's property taking, after which time they cannot challenge them. All Contract 1 properties have been acquired.

A PMOC review revealed that the RAMP needed to be updated to comply with the Uniform Relocation Assistance and Real Property Acquisition Policies Act (Uniform Act). MTACC submitted an updated RAMP during the last week of May 2007. Subsequently, FTA Real Estate met with MTA's Real Estate group to review lessons learned on the Fulton Street Transit Center project which utilized the same process as the SAS project. The MTACC continues revising the SAS RAMP to reflect the additions requested in the FTA's August 13, 2007 letter. The MTA has retained a Consultant, O. R. Colan, to assist with the relocating residential and commercial tenants

## **Attachment B - Summary of Concerns and Recommendations**

The status of PMO Contractor Concerns and Recommendations is shown in the following summary chart.

**Note:** Items marked with a "C" in the "PMO Contractor Status" column will be dropped from future reports.

## **Key Item**

Subtask 11A.XX CLIN 0002 – Technical Capacity Review

Subtask 12A.XX CLIN 0003 - Monitor Project Development and Implementation

#### Legend

Priority (Pr)	Category (Cat.)	Grantee Action (D A I)	PMO Contractor Status
1 – Most Critical	S1 – Scope	D – Remedial Action Developed	R – Review On-going
2 – Critical	S2 – Schedule	A – Remedial Action Approved	C – Completed – No further review required
3 – Least Critical	S3 – Safety/Security	I – Action Implemented	
	B – Budget	Y – Yes	
	Q – Quality	N – No
